ABOUT

I am an ambitious, self-motivated, and responsible undergraduate student pursuing a Computer Science and Engineering degree. My passion lies in software development, and I am eager to contribute my hardworking attitude and technical skills to meaningful projects. Whether coding, problem-solving, or collaborating with others, I thrive in dynamic environments where innovation and teamwork intersect.

PROJECT

Personal Portfolio Website

I recently designed and developed a **multipage personal portfolio website** using HTML, CSS, Bootstrap, and JavaScript. Here are the key highlights :

Technologies Used:

- HTML: Structured the content and layout.
- CSS: Styled the website for a polished appearance.
- Bootstrap: Ensured responsiveness and consistency across devices.
- JavaScript: Added interactivity and dynamic features.**

Basic To-Do List App

I developed a basic To-Do List App using JavaScript. Here are the key points:

Objective:

- Developed a user-friendly to-do list application using HTML, CSS, and JavaScript. The app allows users to add, edit, and delete tasks, helping them manage their daily activities efficiently.

Technologies Used:

- JavaScript: Wrote the logic and functionality.
- HTML/CSS: Designed the user interface.
